

PKon MMS

Centralized administration

PKon **Multi-Site Management System** provides the technology to easily connect and manage many pharmacy sites. With PKon MMS, you won't need to hire a computer specialist to operate and maintain the system, as all your stores are just a keypress away. Security is good whether you are communicating on an inside network, or over the Internet, as PKon MMS takes care of all the communications requirements so that you can focus on pharmacy.

Overview

- A Linux RAID server capable of Internet and Intranet secure communication.
- Remote access available with the push of the Enter key.
- Accessing remote pharmacies does not interrupt pharmacy operation.
- Data exporting and transfer.
- Interstore access.
- Security, communication and transport functions managed by SRS.
- Remote printing of reports, scripts, and A/R statements.
- Integrated with all PKon products.

Product Functions

- Samba interface so that standard office MS Windows systems can access downloaded and exported data.
- Menu list of all remote pharmacies.
- Full integration with PKon RxNet.
- Quick 1-3 second connection time.
- Remote printing at local laser printer, including all reports and forms.
- Can be integrated with PKon Reconciliation functions.
- Options available for multiple remote pharmacies.
- Graphical or text interface.
- Multiple windows (stores) on one screen.
