

PKon Reports

Fast and informative reporting is the goal of every report system. With PKon Reports, you receive the power of custom reports, without the hassle of designing your own reports. Additionally, most reports are very comprehensive in their design and we are always adding to our reports monthly to keep pace with industry changes.

Standard Features

- Integration with PKon RxNet
- Report generation does not slow down system!
- Super fast report generation through powerful SQL database. Most reports complete within 15 seconds.
- Flexible report selection options so that reports can have the look and feel of being custom, without the agony of designing a special report.
- Work reports and logs as required by law, with separate listing for controlled substances and for narcotic substances built into the body of each report.
- Accurate and informative daily billings reports
- Financial reports that augment PKon's real-time analysis for profit, usage, and efficiency.
- U&C lost profit scanning to maximize profits while minimizing customer dissatisfaction.
- Security functions limit types of reports that can be accessed.

Special Features

- Integration with PKon MMS for multistore remote printing and data exporting.
- Export reports to pdf, csv and other formats.
- Prints patient and doctor mailing labels.
- Integrated with PKon Autofax for sending of reports such as patient profiles to doctors.
