

# PKon RxNet

## PKon makes profit a reality

The PKon Pharmacy Management System is a family of software programs designed to assist community pharmacists in the process of drug dispensing, insurance billing, financial controls, and general pharmacy business. If you are looking for an efficient and easy to use pharmacy system, then PKon is your choice. PKon makes profit a reality and assures a good ROI (return on investment). Here's a sampling of just some of the features that make the PKon system stand out. But no software can be fully experienced on paper, so please feel free to contact SRS directly and to visit an SRS customer near you. SRS also offers remote, on-line demonstrations.

### System

- Multiuser/Multitasking system.
- From one to twenty stations, each with two working tasks.
- Complete sharing of all resources between stations, including printers, modems and Internet with all hardware and software provided by SRS.
- Internet capable, eClaim submission, browser-capable, firewall, Unix-based.
- All support, both hardware and software, provided by SRS. Support is not 'farmed out'.

### User Interface

- Logical and straightforward design with no codes to memorize. Easy for the entire pharmacy staff to use effectively.
- Fully menu driven interface with intuitive menus--could be the easiest pharmacy system to learn.
- Pop-up windows display available choices where helpful.
- Search for drugs, patients, etc., by using only part of the name—the system will display all matching choices.
- Fields can be edited without the need to retype the entire field.

## System Functions

- Fast, multi-tasking script entry allows multiple scripts to be entered simultaneously. Any program functions can be performed simultaneously—no screen limitations.
- Smart telecommunications with automated backup switch processor.
- Server-class host.
- Direct interaction with PKon Family products, so there is no double entry, and no 'interface'.
- Integration with many industry standards.
- Data translation/communication with external systems.
- Fast real-time scanning

## PKon Family of Products

- PKon A/R - provides major medical, workman's compensation, receivables, and group home billings.
- PKon MAR - provides nursing home functions for small to medium sized homes.
- PKon Reports - simple to run reports with options for retrieving information a pharmacy is likely to need.
- PKon IVR - integrated digital call processing system.
- PKon TimeClock - True time-card functions with integration to InterMed payroll services.
- PKon POS - Integrated POS system.
- PKon Checkbook, and more.
